Driven tools for CNC turning centers allow milling, drilling, and tapping operations on the lathes without additional parts handling. Also in this case GS can supply a wide range of types in order to equip the CNC lathes and turrets of the most popular builders on the market with an unbeatable price/quality ratio.

Main Technical Features

- Main body designed to maximize rigidity and reduce vibration
- Specially treated corrosion resistant steel body
- Angular contact bearings + taper roller bearings on output spindle for better rigidity and longer life
- Gleason spiral bevel gears with completely ground involute form
- Rated to 70Nm torque and 6000 rpm
- Internal coolant option - up to 100bar
- Designed, manufactured, and assembled in Italy
- 2 Year Warranty

▼ Direction of rotation is opposite to the machine spindle

▼ Direction of rotation is the same as the machine spindle
